"Don" Carmichael Returns.

Mr Donald Carmichael, the noted boxer, returned on Friday from his trip to Great Britain. "Don" admits getting a lot of experience on the trip, and was fairly successful in his fights. The climate, apparently, did not agree with him, as he had been laid up at different periods, which interfered with his matches, necessitating a postponement of these. "Don's" next excursion will probably be to the West Coast.

Somebody's Gotta Be Done.

It now appears to be the open season for the crows to invade the local gardens. On July First a stray hovine, or bovine, jumped the wall of an ex-Mayor's garden, in the north-east section and, according to the complainant, eat (or ate) "all the lettuce and gooseberries hanging on the vines." This ex-Mayor expects his garden to be an almost total loss for 1937, as earlier in the season, the robins secured an option on his strawberries.

Duffield Sports Day, July 28.

Duffield Community are holding their annual picnic and sports day on the above date, this year. There is to be horse racing, baseball, etc. In addition there will be fifteen rounds of boxing and 2 wrestling bouts.

Field Day, Lacombe, July 12

For anyone who enjoys good live stock the most interesting field day of this summer at the Dominion Experimental Station at Lacombe will be, Monday, July 12th. This field day is being sponsored by Alberta Shorthorn Breeders' Ass'n, and the program will consist of addresses by some of the leading Shorthorn breeders of the Dominion and USA. At the Experimental Station there are many branches of work, including poultry, bees, horticulture, forage and cereal crops and the large herd of Yorkshire and Landrace hogs. For many, the most attractive feature of the program will be the parade of about 30 Shorthorns and 35 Clydesdales.

Missouri Lutheran Conference

The sessions of the District convention of Alberta and British Columbia of the Lutheran Church (Synod of Missouri and Ohio), which opened here June 30, closed on Tuesday, July 6th.

There were 46 pastors and 21 lay delegates present, as well as a large number of visitors; the latter of whom took quite an interest in the proceedings.

The sessions were held daily—from 8:30 to noon; and from 2 to 5 p.m.

On Friday evening a service at St Matthew's Church was held, when the preachers were—Rev G H Rake of Comrose and Rev C C Yanko, of Vernon, B.C.

A special service was held on Synodical Sunday, July 4th, at which members of the congregations in this neighborhood accepted the invitation to be present. Rev Victor Meyer of Nelson, B. C., preached in the German tongue at this service; and Rev Erick Hopka of Prince George preached in English.

A service in English was held in St Matthew Schoolhouse Number Two at 10:30 o'clock on Sunday morning, July 4th, when Rev E Hopka of British Columbia delivered the address. This service was well attended.

An educational service was held on Monday, July 5th, when the service was in charge of Rev W W Eifert.

46350 MILES IN 2 MONTHS ...

AVERAGE RUNNING COST LESS THAN 3¢ A MILE

THAT'S THE RECORD OF THIS FLEET OF 1937

CHEVROLET Trucks

"Recently, as you know, we purchased from you ten 1937 Chevrolet trucks. I thought you would be interested to know that in a little over two months this fleet has totalled 46,350 miles. The average operating cost, including gasoline, oil, depreciation, repairs and insurance was 2.96¢ per mile! This driving, of course, was done in winter weather. Naturally, we are delighted with this record, particularly as the average running cost before replacing our truck fleet with Chevrolets was 5¢ per mile."

Yours very truly,
JAMES CREDLAND & SONS, LTD.
TORONTO

YOU HAVE to be personally "sold" on a purchase before you recommend it to your friends. In the Chevrolet Truck files are unsolicited testimonials that read like "believe it or not" items, yet they are honest, owner-histories of these famous commercial vehicles!

If you use trucks, take a tip from big Canadian business firms. They keep an accurate expense account of every unit in their fleets... and as a result... specify Chevrolet... for long life and economy!

Why not check specifications... compare values... inquire about the convenient financing arrangements of the General Motors Instalment Plan. If you do, your logical choice from every angle, will be... Chevrolet!

INQUIRE FROM YOUR NEAREST CHEVROLET TRUCK DEALER

Government By Commission

It is not perhaps surprising that organizations and individuals are inclined to look askance at what has been termed the "rising tide of bureaucracy" as represented in the growing tendency to hand over the reins of governmental administration to appointed boards and commissions.

That there is a growing trend in this direction, both in the Federal and provincial arenas in Canada cannot be gainsaid. The evidence is palpable. One only has to look around and enumerate, for proof that a multiplicity of boards and commissions are at work performing, in some cases the functions of governments, and in others, the duties formerly delegated to the courts. And the tendency is towards increased growth of administration in this form.

Apart from the question of expediency, there are, of course, arguments advanced in support of administrative government by appointed commissions and boards and some of these arguments are not without foundation. For instance, it is urged with a good deal of truth that demands by the people upon their governments for extension of existing services and new services is increasing all the time, and that these services can be rendered with greater expedition and more efficiency by boards set up for the purpose than by governmental departments.

The argument cannot very well be refuted, but the question which the people have to face is whether or not they are willing to surrender a good many privileges, such as the principle of governmental responsibility to the electorate, the right of appeal against decisions and the right to know what is going on, for the sake of speed and perhaps greater efficiency.

That these privileges—or should one call them rights?—are impaired and threatened to an increasing degree with the multiplication of administrative boards and commissions was recognized at the recent convention of the Law Society of Saskatchewan, when delegates approved a committee report pointing out some of the principal objections to administration by commission and decided that the committee continue its work and further, supported a proposal that a program of education which would bring the facts and the problems to the attention of the public be conducted.

One of the chief objections to commission form of administration is the fact that arbitrary powers are usually vested in organizations which are not directly responsible to the electorate and very often there is no appeal to the courts from the dictates and rulings of these bodies. In other words, the individual, deprived of recourse to the courts in which he has every confidence, has no power to obtain redress. That is to say, one of the fundamental rights of the individual is longer safeguarded to that extent.

Another objection, and this was stressed by the Law Society committee, is the fact that these appointed tribunals frequently conduct their hearings in secrecy, with press and public excluded, and coupled with that is the fact that reasons for decisions are not usually given. Under these circumstances, it is not surprising that the committee decided that "the comparative secrecy of the hearing tends to destroy confidence."

When rulings and decisions, binding upon the public, are given behind closed doors and without any accompanying reason therefor, it is to be expected that public confidence in tribunals that carry on their work in this manner will not be very strong.

On the other hand it may well be pointed out that frequently enough the wheels of justice operating through the established channels of the law courts travel slowly and, to the layman, it appears that the processes involved often entail unnecessary expense, possibly because of slow motion and the necessity of traversing a road bordered by a good deal of red tape.

No one in this country would wish to support the informality, sometimes bordering on indigity, which marks the administration of justice in some of the courts on the other side of the international boundary, but if measures can be adopted here which would simplify procedure and reduce its costliness without robbing the courts and legal procedure of the dignity and respect in which they are properly held, they would be generally welcomed.

It is to the credit of the barristers attending the Saskatchewan convention that some recognition was given to this phase of the general question. The very fact that lawyers themselves recognize the advisability of modifying procedure and reducing expense to suit present day circumstances and conditions is encouraging.

Demonstration Was Success

German Musicians Conducted Orchestra Over Long Distance 'Phone
Long distance conducting of an orchestra over the phone has been demonstrated for the first time in Berlin by Dr. Erich Fischer, a student of musical history, of Zurich.

Dr. Fischer conducted from the Berlin Swiss legation, while the orchestra was miles away at the Musical High school of Berlin. The conductor and the orchestra were connected with a telephone cable and every member of the orchestra supplied with earphones. Fischer conducted his orchestra by brief verbal directions, supported by a muffled piano. The demonstration proved a perfect success. It will be repeated over longer distances in the near future.

Social Reform Legislation

Farmers' Creditors Arrangement Act Brings About Reduction In Farm Debt

Operations of the Farmers' Creditors Arrangement Act, one of the social reform statutes passed by the Bennett government and guaranteed in the appeal to the privy council, have brought about reduction of some \$35,000,000 in farm debt and an interest saving of about \$4,000,000 a year.

Put into effect in 1934, the act has brought 27,000 applications from debt-ridden farmers and 22,000 of these have been dealt with to the extent the applicant has had his financial position rearranged through compromise with his creditors.

Mortgages involved have totalled about \$130,000,000 with the greatest percentage of applications coming from the east. Farmers badly struck by the depression coupled with crop and weather conditions have found the act of less use than those who were left with better prospects to start afresh with a degree of relief from debt. This is said to account for the small proportion of applications from the drought areas, where many farmers were left with no assets of any kind.

Will Yield Wealth

Treatment of old floor and wall material from the dismantled refinery section of the Royal Canadian Mint in Ottawa by the Dominion Fuel Laboratories is expected to return hundreds, perhaps thousands of dollars, it was learned. Gold and silver particles lodged in the wall and floor material through past years will be recovered.

Roads of granite in seven colors are being laid in England.

New Secret Of Longevity

Brigadier-General Says Wear Sus-

penders To Keep Fit
It is pleasing to find a variation in the prescriptions for good health at great age. Too much they have been limited to long walks, total abstinence, regular drinking and the like. Brigadier-General Samuel E. Tillman, who will be 90 in October, astonished the ship news reporters the other day by attributing his fine physical condition to the fact that he has never supported his trousers with a belt. Suspenders are his secret, now revealed by a man who has gained distinction as soldier, astronomer, chemist and geologist.

There is much to say for the Tillman theory. Suspenders may be ugly, while belts are aesthetically, but the old galluses put the weight of the breeches on the shoulders and not on the hips. Put a belt on a man and he will automatically thrust his paunch out to keep the leather from slipping. Give him suspenders and he can put his chest out and his tummy in without fear and social disaster. There is also the element of congestion of the abdominal capillaries under pressure of the belt.

Suspenders were out when the vogue for country life made men try to be beautiful as come coat and waistcoat. They are coming back now and General Tillman's certificate will give them another fillip. If a man cannot have two cars in his garage he can express prosperity by having suspenders for each and every pair of trousers.—New York Sun.

SELECTED RECIPES

RHUBARB PICKLE

- 1 qt. rhubarb, cut fine- 1 qt. onions, chopped- 1 pt. vinegar
- 2 cups brown sugar
- 2 cups Crown Brand Corn Syrup
- 1 tablespoon salt
- 1 teaspoon cinnamon
- 1/4 teaspoon cloves
- 1 teaspoon allspice
- 1/4 teaspoon cayenne pepper
- 1/4 teaspoon paprika
- 1/4 teaspoon Tabasco sauce

Method: Cut rhubarb fine; put onion through food chopper. Combine all ingredients together and simmer gently until rhubarb is tender. Seal hot in sterile jars. Makes eight pints.

Drouth Hits Mars

Astronomers See Signs Of Arid Conditions In Equatorial Area

The planet Mars is having a drouth worse than any in the midwest dust bowl and the African Sahara.

The telescopic story of the drouth was reported to the American Association for the Advancement of Science by two Mt. Wilson astronomers, Dr. Walter S. Adams and Theodore Dunham, Jr.

This drouth was observed in the equatorial regions, the area where dark spots that astronomers suspect is vegetation, appear in summer.

It is the area fed by the canals of Mars. Judging by this report there is no doubt Martians use irrigation, if what astronomers see is vegetation.

There are 8,190 miles of railways in the state of California.

Better Commission Programs

Extension Of Programme Period Forecast In Announcement

Extension of the daily programme period to 12 and possibly to 16 hours in October when the new high power transmitters in Ontario, Quebec and British Columbia will go into action, and the formation of light opera companies in Montreal and Toronto, were some of the announcements made by Major Gladstone Murray, general manager of the Canadian Broadcasting Corporation, following a meeting of regional directors and programme directors.

Grand opera concerts from United States will be continued, the general manager said, but it was felt that Canadian light opera talent existed to a sufficient degree to warrant formation of two companies which will give a series of 26 concerts, 13 from Montreal and 13 from Toronto.

Historical dramatizations and sketches based upon the activities of the Royal Canadian Mounted Police and other features representative of Canadian life, will be presented, with musical programmes originating in principal cities from coast to coast.

Of interest to western Canada was Major Murray's announcement that United States programmes will be brought in from Pacific coast stations to avoid the time inconvenience to western listeners when these broadcasts are brought in from eastern stations.

Expert girls earn from \$40 to \$80 a week in one London factory where the best quality fur coats and scarfs are made.

How fast can your car go? Is the usual question. It ought to be how safe do you drive.

Has World's Finest Service

Scotland Yard Able To Trace Fingerprints Within Five Minutes

Scotland Yard men will have the finest service of criminal records and fingerprints in the world when the extension to its building at Westminster is completed.

The Yard's "Who's Who in Crime" will incorporate the latest mechanized system of card-indexing finger prints. At present the Yard's library contains 5,000,000 prints, or more than 600,000 sets.

The appointment of Chief Inspector George Blackburn, of the West Riding police, as "adviser for the development of police records," is a link in a scheme to put the entire police records of the country at the disposal of any force when needed.

The present fingerprint classification system is so complete that the criminal record of a suspect can be produced within five minutes of the receipt of the prints. A similar system will be built up among provincial forces.

Most birds observe territorial boundaries, and each bird defends his nesting area against other birds which seek to intrude.

Postmen of Britain are demanding tailor-made uniforms.

Better Distribution Of Pure Seed Grain Needed To Assist Farmers

Although he recognized the value of purity in cereal seed, Hon. J. G. Taggart, minister of agriculture for Saskatchewan, reminded members of the Canadian Seed Growers' Association at their annual convention at Saskatoon, that there were "other factors to be considered in the production of wheat."

Raising the standard of the whole Canadian wheat crop was a laudable objective, but one could not expect that the majority of farmers could become seed growers overnight. It must be remembered that there were few farmers capable of becoming seed growers, the minister said, and he believed that this was a good thing. "The production of pure strains in wheat must be placed in competent hands," he asserted.

Because the great majority of farmers were not seed growers, it was to the interest of members of the C.S.G.A. to conduct work which would improve commercial wheat, Mr. Taggart declared. The policy of holding new varieties until they were absolutely pure and ready for registration, and of keeping the progeny of that registered seed also pure, would not aid the commercial farmer materially.

"You must remember that the commercial farmer is the backbone of this country. If he fails, you, too, fail." The primary motive of the commercial farmer was to make money, and the seed growers could aid him in that respect by loosening restrictions placed on the distribution of good seed grain.

This objective, Mr. Taggart believed, could be attained through use of the seed exchange plan, which provided that farmers could receive registered or certified seed wheat, seed it and distribute the harvest, or part of it, to his neighbor farmer.

In his opinion, it was the only practical plan whereby the purity and standard of the commercial crop could be raised, he said.

Mr. Taggart suggested two factors which seed growers should bear in mind. (1) That seed growing should be confined to expert growers, and (2) that some intermediary steps, resulting in multiplication of the seed produced, must be devised to guard purity and to supply the commercial farmer.

"I believe that in this manner the whole standard of the wheat produced in this country could be raised at little cost," the minister of agriculture asserted.

Costly inspection of grain would also be unnecessary if the seed exchange plan was invoked. Inspection of grain could be carried out according to the commercial farmer's viewpoint.

Good Polishing Agent

Vinegar Can Be Used In Great Variety Of Ways

Dull brass may be quickly cleaned by rubbing it with a piece of rag dipped in vinegar mixed with a little salt. Leave it for a few minutes then wash off with warm water. Dry well and polish.

To give light or dark paint a good gloss, use equal quantities of vinegar and paraffin. Apply this with a soft cloth and polish with a duster.

Varnish may be cleaned with a chamolite leather dipped in vinegar and cold water.

To clean a vacuum flask that has not been used for some time, crush an egg shell finely and put it in the flask with some vinegar. Put in the cork, shake well and rinse with warm water.

Stains in flower vases or decanters may be removed by soaking them in warm water containing vinegar and salt. Shake them occasionally and rinse well in cold water.

Dark woodwork will keep their colors better if they are washed in warm soapy water containing a little vinegar.

No Time For Holidays

Although 73 years old, Dr. Frank M. Chapman, ornithologist of the American Museum of Natural History, has no time for vacations. "The greatest hardship you could give a naturalist would be to prevent him from pursuing his calling," he told an interviewer.

Believes In Luck Charm

English Woman Sure Mumified Foot Brings Good Fortune

"Pharaoh's curse" is a lot of nonsense. It has never brought me anything but good luck."

Mrs. J. B. Bray, aged 63, Bristol, who made this statement, has for more than 30 years had in her possession what is believed to be the mummified foot of an Egyptian princess which came from a royal tomb in the Sahara Desert.

"The foot is a strange little thing: it is about six inches long, still in perfect condition, and shining like polished brass," Mrs. Bray said.

"It was given to my husband by a friend who took part in an excavating expedition in 1906, and ever since then it has acted like a charm," she said. "It has brought me health and happiness."

"Before I had the foot I had been ill for 15 years. No doctor could say what was wrong with me."

"My husband and I decided that Pharaoh's curse" could not make me more ill than I already was, so I held the foot in my left hand and wished for health again."

"It was amazing. In less than a month I was perfectly well, and I have never been ill since. Now, at 63, I feel well that I could knock the world over."

"Whenever I am in a difficulty I just hold the foot in my left hand and wish. Things are all right again in no time, and it works almost as well for my friends, though I allow only a few favorites to touch it."

"To give you an example. During the war we lived on the edge of Kemington Park. One night an air raid started, and my husband and I sat in the drawing room feeling very frightened and praying for our safety. He told me to fetch the princess' foot, which I did, and held it in my hand throughout the raid."

"A bomb fell in the park. The windows of every house in the street were smashed. But our house remained absolutely untouched."

"When my husband died seven years ago, things began to go badly for me. I lost all my money and was nearly ruined. Then I took to carrying the foot about with me, and all at once I was in the lap of fortune again."

Asked Patrons To Help

French Railway Improved Service By

Practical and direct co-operation, between the Eastern railways of France and the travelling public, has brought scores of helpful suggestions since Jan. 1, and the experiment of soliciting passengers' criticism, comment and counsel, already a success, will be continued indefinitely.

"Help us to run the railroad upon which you ride," was, in effect, the invitation addressed by the "Est" railroad, which, as the name indicates, serves eastern France, and the response was prompt, voluminous, and frank. "Tell us what is right, yes!" said the rail officials, "but tell us also what is wrong," and the passengers did both—in candid fashion.

More than 400,000 pamphlets, inviting such suggestions have been distributed since the first of the year by the "Est" railroad.

To procure the opinion of its passengers, the railroad also placed 960 suggestion boxes in its various stations, Paris, Metz, Nancy, Belfort, Chaumont, etc., and the daily return, so far, has never dropped below 60. Generally, it was near the 100 mark. What distinguished the suggestions was that, in the most part, they were constructive, and suggested practical means for improving the service.

A Valued Customer

Canada has a valued customer in Latvia, a Republic with two million inhabitants created in 1918 out of a bit of Russia on the Baltic. Last year the Latvians spent more than \$400,000 here, mostly for copper.

There are about 5,500 islands round the shores of Great Britain, including five hundred in the Hebrides group. 2210

Likes His Mountain Home

Hittler Spends Most Of His Time In Bavarian Alps

If and when Premier Mussolini, flying across the Alps, visits Chancellor Hittler, he will be entertained in a mountain home that for beauty of setting and artistic content has few equals in Germany.

"Haus Wachenfeld," five miles above the upper Bavarian Spa of Berchtesgaden, now is much more the executive mansion than the Reich's Chancellery in the Berlin Wilhelmstrasse or the "house of the Reich's president" a few doors north. Hittler spends more of his time in his home on the "Berghof" than he does in Berlin. He loves the solitude of the mountains.

Hittler has enlarged the house considerably. The roof is heavy and slated. The verandah of the second story has been converted into a series of loggias with wide arches resting on massive pillars.

Heavy oak beams and exquisite panelling render the great hall on the main floor a thing of beauty. From his windows there is a fine view of the Bavarian Alps. A costly gobelin tapestry and carefully selected paintings adorn its walls. A grand piano stands in a corner.

Values His Dog

Animal Saved Vancouver Man When Horse Fell On Him

Bert Pritchard said he "wouldn't take \$500" for the Alsatian dog an Indian gave him three years ago.

"The dog, Silver, saved James Cook, former Calgary resident, from possible death, under an 1,800-pound Clydesdale horse which slipped and fell on him as he was clearing property in West Vancouver."

Silver nipped the horse on the flank and nose when it failed to answer Cook's frantic shouts to stand up. The bites turned the trick.

Pritchard said the dog previously had located a lost person, and once stood guard over an injured child who would mean.

Would Mean Greater Safety

New Inner Tube Prevents Swerve When Blowout Occurs

The life-guard tube, a new development in automobile inner tubes which the owners claim will put a curb on swerving caused by blowouts, was demonstrated at Yonkers, New York.

This new device is a tube within a tube. When a blowout occurs, the air escapes from the outer tube, but a tiny vent in the inner tube prolongs the deflating of the tire, preventing a possible swerve off the road. This gives the driver ample time to bring the automobile to a stop and fix things up.

What Price Grenadier

Frederick III. of Prussia once killed a 66-pent stag and prized the antlers highly. Later, they came into the possession of Frederick William, who traded them to the King of Saxony for a regiment of six-foot grenadiers.

Years of Wear in Crocheted Lace

Household Arts by Alice Brooks

String and Quickly Learned Medallions Make Choice Accessories

PATTERN 5869

Simple stitches—an easy pattern—a striking motif make a bedspread that is unique in its class. Something to hand on from generation to generation. Inexpensive to crochet in natural or colored string. Use it to dress up your own bedroom or add a luxurious note to your guest room. You can make a lovely matching scarf, using finer cotton. In pattern 5869 you will find complete instructions for making the medallion shown; an illustration of it and of all the stitches used; material requirements; a photograph of the model.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg. There is no Alice Brooks pattern book published.

Physician Gives Explanation Of The Causation Of Dreams And Their Interpretations

Would Make A Difference

Slow Thinking Children Do Better In Group By Themselves

It is rapidly being forced on the attention of educators that school children must be separated into two classes. The backward children become more backward when thrown into the same classes with the bright ones, and of necessity the bright ones are held back by the others.

Child psychologists tell us that if we were thrown into a group of supernumeraries, we would feel so inferior to them that we would not only become dumb in their presence, but would be permanently discouraged because of the contact.

If this be true of a mature person, how much more is it true of an impressionable child? The child is infinitely more sensitive than the grown person, and much more easily embarrassed and discouraged.

Many children considered incorrigible are not incorrigible at all, but simply discouraged with life and trying to wreak their vengeance on the grownups who seem to refuse to understand them.

The sooner it is discovered that a child is a bit slow, and the sooner he is taken out of the class with the rapid thinkers and placed in a group of children of his own mental speed, the better for all concerned.

We are learning that it is no disgrace to be slow in school. It is rare indeed that a cum laude student makes any large financial endowment on his alma mater. The money-making faculty and the ability to ascend the scholastic heights are rarely combined in the same man, and who shall say they are not equally useful in a rounded world.

Get your slow child into a class of his equals, and you will soon relieve him of his inferiority complex and enable him to live a normal and happy life.—Kiwans Magazine.

In Great Demand

New York Renter Of Dress Suits Reports Business Good

People are cultured nowadays, says a veteran renter of dress suits in New York.

"Clerks, stenographers, even newspaper men to-day get married or go to parties in tails," the renter said. "Would you believe it, lately a lot of nice looking fellows came into my shop to rent dress suits for a wedding. Two days later the suits came back in fine shape. Not a spot on 'em! Who were they but a bunch of longshoremen who'd been to another longshoreman's wedding!"

"People go to culture nowadays," he concluded.

Large government expenditures continue to increase industrial activity in Mexico.

A simple interpretation of dreams in a physiological sense that would rule out "much of the significance attached to dream interpretations by some psycho-analysis" was given to the paediatrics section of the Canadian and Ontario Medical Association's convention.

Dr. Howard Spohn, discussing the physiology on the central nervous system in regard to paediatrics, described sleep as a state of interruptions of connections between the brain and the organs. In sleep, he said, isolated processes occur and produce dreams which are indefinitely related at times to waking conditions.

For example, he said, in European countries where famine has been prevalent at times, dreams of various foods have been frequent. Sleeping persons suffering from thirst frequently dream of water.

Intense thoughts produced by concentration may persist through sleep, he said, perhaps leading to the idea of sleeping over a problem.

In his view, he declared, it was better to describe interpretations in a physiological than a psychological sense and such a simple interpretation should "alleviate some of the fears and terrors of the functionally nervous patient."

Dr. Spohn described how "conditions reflexes" are induced or acquired. The mere sight of a rose, even an artificial one, gives some persons hay fever, he said, indicating they had been conditioned to react to the presence of a rose by experiencing hay fever.

He gave other examples: The individual who becomes faint and hysterical at the sight of a snake after being frightened by conditions by his first encounter with such a reptile; the uncontrolled attacks which appear with sudden noises in shell-shocked individuals conditions in the war.

Many mental derangements and behavior problems were often results of improperly treated conditioned reflexes, he said.

"By means of the unconditioned reflex the individual is connected with the outer world by innumerable living threads," he continued. "How important then that in the young and in the mentally ill these reflexes should be of the proper character, and how tremendously important are the first educational conditions reflexes used in treatment, and how fraught with possibilities are those states where every change in the external media, even seemingly insignificant ones, is reflected on a highly sensitive nervous receptor in the brain."

"Great care must be exercised in creating a suitable atmosphere for educational work in hysterical children and in re-conditioning the problem child," he continued.

"Speaking generally, it is appalling to note the lack of interest in proper reflex conditioning which goes on in hospitals and institutions for the treatment of functional nervous disorders." He complained mainly that hospitals were noisy.

The Way To Do It

Follow This Advice And Keep Out Of Trouble

The way to have teeth with which you can crack nuts is to refrain from cracking nuts with your teeth.

The way to have a stomach in which you can put practically any kind of food is to refrain from putting practically any kind of food into your stomach.

The way to have eyes with which you can read fine print in a poor light is to refrain from reading fine print in a poor light.

The way to have friends who would give you the shirt off their respective backs is to refrain from asking them for their shirts.

The way to make friends with a traffic cop so that he will overlook slight infractions of the traffic rules is to avoid slight infractions of the traffic rules.—The Transmitter.

Two kinds of trees, Sitka spruce and Alpine hemlock, make up 70 per cent of the timber growth of Alaska.

LIBERALS SWEEP BACK INTO POWER IN NOVA SCOTIA

Halifax.—Premier Angus L. Macdonald's Liberal government was swept back into power in the Nova Scotia general election on a tide of votes that won for it 25 of the legislature's 30 seats and sent Opposition Leader Gordon S. Harrington down to personal defeat in his own riding.

Five Conservatives were elected, three less than in 1933. All cabinet ministers were returned with substantial majorities.

Liberals were victorious in all five Halifax seats—three in the city, two in the county. They swept all eight in Cape Breton Island.

The adjoining counties of Cumberland and Colchester returned four of the five Conservatives elected. The fifth came from Queens, on the south shore. In Cape Breton East, only three-cornered fight of the day, Rev. W. T. Mercer, Labor, beat out the Conservative candidate but lost to a Liberal.

George Morrison's victory over the Conservative leader in Cape Breton South was the first personal defeat ever suffered by Col. Harrington.

In Premier Macdonald's riding, Halifax South, he rolled up a majority of more than 1,100, or 600 more than he enjoyed in the 1933 polling. Although there were approximately 25,000 more names on the voters' lists than in 1933, total votes polled were about the same as in that year. Fine weather in most districts aided party workers.

Premier Macdonald was given a wild ovation when, with others of the Liberal candidates in Halifax, he appeared in the downtown district as return of his government was assured.

"The overwhelming support that has been given to the Liberal party in this election can only be interpreted as an expression of satisfaction with the work which we have accomplished during the past four years and with the program which we have in mind for the future," he said in a statement.

No candidates lost their deposits although in some cases the government representatives included the majorities they had in 1933.

Short Season Commences

Summer Is Now In Full Swing At Goldfields

Goldfields, Sask.—In the sub-Arctic and Arctic the short summer is on, trees are in full leaf, flowers are in bloom, birds are nesting, and it's 80 above. Berry bushes, too, are blooming. The latter include raspberries, blueberries, gooseberries, cranberries, dew berries and others. In less than a month fruit will have formed and will be ripening. Bears will be happy.

Back in the deep dark muskies and lowlands, mosquitoes, mosquitos and black flies lie in wait to initiate the innocent. In the Athabasca country it is summer. Sleigh dogs are resting. Northerners are glad that this season is short and sweet.

Want Landing Field At Victoria. —The Greater Victoria airplane committee decided to urge on Hon. C. D. Howe, federal minister of transport, establishment of an auxiliary landing field here in connection with the projected Trans-Canada Airways development. The committee will forward its request to the minister at Ottawa.

Will Investigate Costs. —Judicial inquiry into highway construction costs in Alberta, to be conducted by Mr. Justice Laumey, Calgary, probably will open in Edmonton August 16, Attorney-General J. W. Huggill stated in an interview here. He said commission counsel had not yet been appointed.

Heads Insurance Company. —Appointment of G. Howard Ferguson, former prime minister of Ontario and Canadian high commissioner in London, as president of the Crown Life Insurance Company in succession to the late Sir Robert Borden, was announced here.

Agricultural Research

Essential To Future Progress, Says University Man

Saskatoon.—Intensive research in agriculture, tempered with the knowledge that conditions affecting the industry were flexible, was essential to future progress, asserted Dr. C. B. Jensen, of the agricultural economics division, University of Minnesota, in an address before delegates to the Canadian Society of Technical Agriculturists here. Dr. G. S. H. Barton, deputy minister of agriculture for Canada, was chairman of the session.

Dr. Jensen told delegates that future agricultural policy, both in Canada and the United States, would be determined mainly by research, and it was therefore essential that research be divorced from outside influences, and conducted by men who realized that flexibility was an inherent factor in agriculture.

Prior to 1929, little had been heard about policy, but since then, the need for planning economy in many branches of trade and industry had been recognized, the speaker said. In dictatorships, this planning had been effected through strict attention to scientific data, with the human element disregarded. In democratic countries, planning depended mainly upon public opinion.

Research, the speaker declared, must first seek truth, and then face facts as they actually existed. Secondly, it was essential that the truths so learned be applied with a long-range view in mind. Research was absolutely necessary to the formation of a satisfactory agricultural policy, he claimed. It was the basis of progress, for it provided reasons for what had already happened, and gave an inkling of what might be expected in the future.

Many mistakes he has been made in the past respecting the use of farm timber and mining lands. When unexpected problems arose was the only time persons engaged in agriculture realized that a different policy should have been followed in the first place. This situation was the result of a lack of facts.

Need Polar Bases

Required In Canada, U.S. And Alaska, Says Soviet Explorer

Moscow.—Dr. Otto J. Schmidt, leader of the Soviet polar expedition, said in an interview that bases would have to be established in Canada, the United States and Alaska before regular air service between the U.S.S.R. and North America would begin.

He outlined a government plan to establish several north polar camps in 1938 at even more remote spots than the present Soviet base and declared the government intended to continue scientific work in the polar region as a permanent project.

The explorer vowed agreement with the recent expressed view of Sir Hubert Wilkins, polar explorer, that a submarine could be used to reach the pole but he said Russia had proved that aeroplanes were more practical.

Train Reaches High Speed

114 Miles Per Hour On Test Run In Britain

London.—A speed of 114 miles per hour was attained by a London, Midland and Scottish express train in the course of a record-breaking test run from London to Crewe, Cheshire, and return.

The train—the Coronation Scot—covered the 158 miles from Crewe to Euston station, London, in 119 minutes at an average speed of 80 m.p.h. and a world record for the longest sustained speed will be claimed.

The trip to Crewe was covered in 22 1/2 minutes at an average speed of 73 m.p.h., a record for that run. The train touched 114 m.p.h. near Stafford, a record for a British steam train, while top speed on the return run was 100 m.p.h.

The train goes into service on a 360-minute schedule between London and Glasgow July 5.

Pastor Goes To Prison

Free City of Danzig.—Pastor Rudolph Walther, chairman of the Danzig Confessional church, was sentenced to three months' imprisonment for criticizing Chancellor Hitler and the third reich in a circular letter read from his pulpit. 2210

WILLIAM FULTON

Assistant general passenger agent for the Canadian Pacific Railway at Toronto since 1928, who retires on June 30th. One of the most popular railroad men in Canada, Mr. Fulton has a record of 46 years with the company.

Guard Shoots Prisoner

Convict At St. Vincent de Paul Penitentiary Is Slain

Montreal.—A convict at St. Vincent de Paul penitentiary was shot by a guard at a prison quarry outside the penitentiary walls after an asserted attempt to attack a second guard.

The prisoner was identified as Oneiphore Michelin, 25, of Three Rivers, Que., who was serving a sentence for breaking and entering and theft.

Shot through the head, he died instantly.

An informed source said the shooting occurred when Michelin struck a guard in the quarry, about two miles from the actual prison site but on penitentiary property.

The alleged attack, this source said, was not part of any concerted uprising. Nor was Michelin attempting escape. Apparently, this informant said, he became angered at the guard and hit him. Whether or not he used a weapon was not indicated.

Another guard overlooking the quarry in a high tower saw the occurrence and shot at the convict. The shot was fired, it was explained, merely to disable the prisoner. The bullet passed through his brain.

Carry Greetings To Roosevelt

Washington.—Greetings from T. D. Pattullo, prime minister of British Columbia, were brought to President Roosevelt at the White House by two youths who rode their bicycles from that province to attend the Boy Scout jamboree here. The boys, Arthur Freeman and Phil LaFortune, started from their home in Cobble Hill, B.C., April 26.

Buried At Sea

Portsmouth.—As salutes of 17 guns roared from naval and military batteries, the body of Admiral Sir William Fisher, late commander-in-chief of this naval base, was lowered into the water off Spithead from the cruiser Curacao.

Damage From Insects

Loss Up To 25 Per Cent. Of Crop In Bad Years

Saskatoon.—Damage ranging from 20 to 25 per cent. in bad years was caused to Saskatchewan's wheat crop by insect infestation, declared K. M. King, of the federal entomological branch, who addressed a session of the Western Canadian Society of Agronomy, in convention at the University of Saskatchewan.

Mr. King did not infer that this was an average damage, but he believed, it fair to state that with control measures, more than 10 per cent. of the damage caused to crops was due to insects.

A complete discussion of the infestation of wireworms, pale western cutworms, grasshoppers and western sawfly was given by the speaker who stressed the need for constant study and control.

If there had been no government control campaign in 1934, when grasshopper infestation in Saskatchewan was heavier than usual there would have been little crop, Mr. King asserted.

Insects wreaked a direct and indirect damage on crops, Mr. King declared. In Saskatchewan, statistics collected over the last 11 years indicated that the pale western cutworm and sawfly damage to crops was roughly five per cent. for each insect in bad years, and 10 per cent. in the case of grasshoppers and wireworms.

Would Grow More Wheat

Britain Considers Question Of Increasing Acreage

London.—The House of Commons considered the question of the production of wheat in Great Britain as W. S. Morrison, minister of agriculture, moved a money resolution to implement the plans of the government.

The scheme, announced May 27, amongst other things proposed raising the limit of the "anticipated supply" under the wheat act of 1932 from 48,000,000 to 64,000,000 bushels.

T. Williams, Labor, said the proposal to extend the amount of wheat on which the price will be guaranteed would be further encouragement for farmers to grow wheat on land not suited for it. He argued the United Kingdom could not compete with Canada, the United States, Australia or South America in the production of wheat, barley and oats.

King Opens Art Gallery

London.—The king formally opened the new Duveen sculpture halls at the Tate art gallery. "These sculpture galleries are the finest in the world," the king said in a brief dedicatory speech. The new galleries are a gift to the nation from Lord Duveen and cost £100,000 (\$493,000).

Police Station Robbed

Vancouver.—There were red faces in Vancouver's city police station as officers told newsmen \$500 had been stolen from the safe in the station's general office. The money was deposited as bail for an unnamed Chinese charged with keeping a gaming house.

POLAR FLIERS FETED IN OAKLAND

Soviet Russia's air heroes, the three fliers who made the 5,500-mile non-stop hop over the top of the world from Moscow to Vancouver, Washington, were feted when they visited Oakland, California, their goal on the flight. Shown above, left to right, are: Valeri Chkalov, pilot; Georgi Baldukov, co-pilot, and Alexander Belakov, navigator.

OBJECTION TAKEN TO BRITAIN OVER SPANISH PATROL

London.—Germany and Italy rejected a proposal by Great Britain and France to patrol all of Spain's coasts in the interests of neutrality.

A report Great Britain might recognise Spanish insurgent General Francisco Franco as a belligerent in return for continued collaboration of Germany and Italy in the "hands off Spain" program was denied by a foreign office spokesman.

The spokesman said if the whole non-intervention plan fell through the position might be "very different" and might conceivably carry belligerent rights with it.

The Earl of Plymouth, chairman of the non-intervention committee, in outlining the Anglo-French proposal to take over the Spanish patrol, received a prompt rejection from Germany and Italy.

Both Joachim Von Ribbentrop, German ambassador, and Count Dino Grandi, the Italian envoy, asked hypothetically what attitude Britain and France would take if their roles were reversed. That is, if Germany and Italy suggested taking over the whole naval patrol.

The Italian also declared "not a single volunteer had left my country for Spain since the ban agreed upon by this committee in Feb. 20."

A suggestion by the French ambassador, Charles Corbin, that immediate arrangements be made for withdrawal of all foreigners now prisoners or wounded in Spain is to be discussed.

Under the patrol proposal, Great Britain would police coasts now held by the Spanish government and divide with France responsibility for patrolling coasts held by the insurgents. They would take neutral observers aboard their ships.

Czechoslovakia, Belgium, Sweden and Soviet Russia approved. Italy and Germany centred their objection on ground the proposal was not based on necessary equilibrium so as to insure absolute impartiality of control.

Search Believed Over

Body Found At Sea May Be That Of Duchess Of Bedford

London.—Discovery at sea of the headless and decomposed body of a woman clad in flying tops apparently solved the three-month mystery of the 71-year-old Duchess of Bedford's disappearance while piloting her private plane in a survey flight over the River Ouse area.

Capt. R. S. Riley of the British steamship Haylor found what was believed the body of the peeress who seemed to fly at the age of 81 and astounded the flying world three years later by setting an England-Cape Town record.

The Duchess took off March 22 from Woburn Abbey, Bedfordshire, en route at Cambridge. When nothing was heard from her, a wide search began.

A few days later the wreckage of a plane identified as hers was washed up on the Norfolk beach, and it seemed certain she had met disaster at sea.

School Children Return

Montreal.—Most of Canada's high school representatives to the coronation have returned home, just in time to relate experiences to fellow classmates, beginning summer vacations. The liner Empress of Australia landed 104 girls at Quebec last week.

Soviets Hold Missionaries

Moscow.—Twenty-five Baptist missionaries who came to Russia in 1929 from the United States have been arrested in White Russia and the Ukraine on charges of espionage, the newspaper Gudok, organ of the commissariat of railways, reported.

British Aviator In Crash

Southampton.—Sir Alan Cobham, aerial explorer, was slightly injured as his plane crashed after leaving the Southampton airport. Cobham was en route to Portsmouth after watching inauguration of the Imperial Airways' airmail plan. His engine apparently stalled.

Thursday, July 8, 1937.

Spruce Grove News.

A League ball game was played here on Sunday, Arrow Buses vs Grovers, resulting in a win for Arrow Buses 9 runs to 5. There being no wind at the time, the dust did not bother the players very much. The Grove team played much better baseball than it did on July First, but this availed it naught. Grove's battery: Alvin Goebel and C Brox.

The Grove's ball team play up at Onaway today, Thursday.

At Stony's sports day last week the Grove team was very unfortunate in losing out to the Onaway team, 6 runs to 7, altho Grovers had their 2 best pitchers in the box during the game.

The Grove's Junior basketballers also were unfortunate in losing out to Garden Valley, by the score of 34 points to 9.

Mr Gus Rivold, who has been in charge of the Searle elevator for the past year, is leaving this week on a motor trip to Banff. On completing his vacation, he will probably accept a position with the Company, in Calgary. The new manager who was to have replaced Mr Rivold, had his coming delayed thru illness.

Residents of Centre street were treated to an unadvertised lecture and song service by gramophone on Sunday morning, thru the medium of a perambulating Mission jitney.

Attention has been drawn to the corner two miles south of Spruce Grove School, where there's a patch of water hemlock, with some beautiful specimens, to be had for the taking.

An Old Settler Passes On.

Sidor Rosinko, an old-time resident of the district south of Stony Plain, passed away in an Edmonton hospital on Tuesday, July 6, aged 68 years.

He is survived by his wife; 3 sons, Steve and Peter, both of Stony Plain; Anthony, of Prince Rupert; and two daughters—Miss Mary Rosinko, of Edson; and Mrs Martha Pruserna, of this district.

Stony Plain and District.

Mr Stephen Germaniak left Monday for a visit with friends at Dufresne, Man.

Mr Emil Enders has returned from a four-months' visit in Peace River country.

Week-end visitors here were Mr and Mrs Lowe Kowsensky, of Grande Prairie, and Mr John Schultz, of Barrhead district.

Mr M Comisarow returned this week from a trip to Frisco, Tacoma, Seattle, Portland and Vancouver.

Dr Manley B. Donaldson has received notification that, following his exams. in May, he will be permitted to practise in any province in the Dominion.

Mr and Mrs Philip Miller have returned from their motor trip to Idaho, Wisconsin and Ontario, having had a very enjoyable time.

Mr and Mrs L M Larson were visitors this week at the Calgary Stampede.

Mr and Mrs Gus Gitzel, from Wembley, are visiting with friends in the district.

Mr John Miller, who sustained injuries last week in a fall from a barn roof, is making as good progress toward recovery as could be expected.

Town Council held its monthly meeting on Monday.

It being a half holiday in Stony yesterday, the merchants and residents motored down to the Grove, and took part in the picnic.

evening in the Town Hall, owing to the regular meeting date having fallen on Dominion Day. Considerable business occupied the attention of the councillors.

LOST—At Edmonton Beach, Lady's Janzen Bathing Suit. Reward on return to Geo. J. Bryan, Stony Plain.

Edmonton Exhibition tickets can be had from Mr Larson, at the Royal Cafe.

BUTTER AND EGGS WANTED at The Royal Cafe.

The World of Wheat.

By H. G. L. Strange, Director Research Department, Searle Grain Co. Ltd.

What is western Canada's most valuable resource?

Some say the top six inches of soil; some the sunshine or hot days and cool nights; others the coal, copper, lead and zinc, mines and oil wells; still others plump for the wealth of the forests and of the fish in lakes and streams.

For my part, I suggest that the 12 inches of rain which on the average falls during the autumn and growing season months over Western Canada, forms our greatest natural re-

VISIT THE PLOTS

At every point where a Searle (Home) elevator is situated, nearby will be found a "Crop Testing Plan" demonstration plot. The newest and best varieties of wheat, oats and barley have been sown, so that farmers and others may observe which varieties are best suited to each district.

All farmers and business men are cordially invited to visit the plots.

See the nearest Searle (Home) agent about the plot in your district.

source.

How valuable this rainfall is can only be fully appreciated when it fails to occur; and so, when we suffer from drought, consequently in turn from poor crops, or, worse still, from complete crop failure.

Unfortunately, only 50 p.c of this most precious rainfall, scanty as it is, is available to the wheat plant; 25 p.c is lost by evaporation—this probably is unavoidable—but 25 p.c also is lost by weeds which, it has been calculated, decrease the yield by about 35 p.c.

Obviously, then, it seems that one of the best ways to increase crop yields, which would actually be the equivalent of increasing the rainfall, is to eliminate the weeds.

Successful Poultrymen!

Are demanding the "Gillespie Maid" brand poultry and Dairy Feeds. Why? Because they are scientifically blended, machine mixed, contain the highest quality ingredients and produce the desired results.

SOMMERFIELD & MAYER, STONY PLAIN.

Obituary.

The funeral took place on Saturday, July 3d of Mrs Margaret Veitch, wife of Mr James Veitch, who had passed away at her residence in Wabamun o. Thursday, July 1st, aged 53 years. Deceased was born in Scotland, and in 192 came with her husband to the Wabamun dis riot, where she resided up to the time of her demise.

She leaves to mourn her loss, her loving husband and 2 sons James and John.

John Armbruster had charge of the funeral arrangements.

Among the Frog-eaters.

A woman with a large family of children took them to a photographer to have a group picture.

"How much you charge me for a picture of my family?" she asked.

"My price is \$10 a dozen," said the photographer.

"That's too bad," said the mother. "I'm afraid I'll have to wait a while. I've only got eleven."

Under Government Rules.

The attempt to introduce baseball into Russia is reported not to have been successful. For one thing, no doubt, the umpire in Russia would be an official of the Soviet Government, of course, and the fans in the bleachers would not be allowed to bowl him out with shouts of "Robber!"

Rocky Mountain Holidays

The busiest tourist season in years is in store for the Canadian Rockies. Banff Springs Hotel and Chateau Lake Louise, recently opened for the year, are enjoying mid-season popularity, while increasing numbers of visitors are planning holidays at the beautiful chalet-bungalow camps at Moraine Lake, Lake O'Hara, Lake Wapiti, Yoho Valley, and Radium Hot Springs.

Attractions such as golf on the sporty championship course at

Banff, riding and hiking over spectacular mountain trails, tennis on splendid courts, boating on glacial lakes, and other sports under ideal conditions make the Canadian Rockies Canada's leading summer playground. Add to this scenery unexcelled in the world, excellent fishing, and endless opportunities for camera hunting of big game and the result is Banff, Lake Louise, or any of half a dozen Canadian Pacific bungalow camps set in valleys or by lakes of outstanding beauty.

Each year in the Rockies several feature events are held in addition to the day-by-day amusements. Among them are the Calgary Stampede, July 5 to 10; Indian Days at Banff, July 22 to 26; outing of the Trail Riders of the Canadian Rockies to Mount Assiniboine, July 30 to August 3; outing of Trail Hikers of Canadian Rockies in Moraine Lake district, August 6 to 9; Banff golf week, August 23 to 26; and Yoho Valley reunion camp of the Alpine Club of Canada from July 17 to 31.
